

ABSTRACT

Doll is formed by sewing together polyester/cotton thread, cotton/polyester fabric, which is cut out in the shape of desired features. Then polyester and metal pipe cleaners are formed in desired shape to form fingers, hands and arms. The pipe cleaners are used to form legs and feet. The pipe cleaner arms and legs are twisted and fused to plastic rod with fusible adhesive. The polyester/cotton yarn is sewn on the head shaped cut out fabric. The yarn is sewn on to the top and side of another cut out head shaped fabric. Fabric is wrapped and fused with fusible adhesive around top of plastic rod. Top of plastic rod is hook shaped. The pipe cleaners that are finger, hand and arm shaped are placed in hand and arm shaped fabric. Hand and arm shaped fabric is stuffed with polyester filler while cleaners are in hand and arm shaped fabric. The leg shaped pipe cleaners are placed in leg shaped fabric and stuffed with polyester filler. Fabric is cut to form rectangle. Rectangle fabric is folded and sewn to form pocket. Cotton felt is cut to form eyes, nose and mouth. Eyes, nose and mouth are fused with fusible adhesive to fabric to form face. Fabric is cut out to desired shape to form ears. Ear shaped fabric is sewn together then stuffed with polyester filler. Stuffed ears are sewn to head shaped fabric that has face. Head shaped fabric with yarn hair is sewn to head shaped fabric that has face and ears. The fabric covered section of the plastic rod is placed in the opening in head. The head is stuffed with polyester filler. The neck and shoulders are sewn together. The arms and legs are sewn to the body. The pocket is sewn to the mid section of the body. The pocket is sewn so that the pocket is inside the body. One side of the body is sewn. The body is stuffed with polyester filler. The other side of the body is sewn to close doll. Studs are fused with fusible adhesive and snap on to ears. Gold wire cord is fused to finger with fusible adhesive.
